A CLINICAL MONOGRAPH · COMING SOON

The Neglected Foot Reclaimed

Ilizarov Principles and Practice in Adult Neglected Clubfoot Correction

A Clinical Monograph for the Deformity-Correction Surgeon

Dr. Shamsul Hoda

MBBS, D.Ortho, MS Ortho, M.Ch. Orth, Dip. Ilizarov (Kurgan)

Ilizarov & Limb Reconstruction Specialist · Chairman, Academic Committee, ASAMI India

Ortho World – Centre for Advanced Orthopaedics, Ilizarov & Limb Reconstruction, Patna & Hajipur drhoda.in

Contents

PART I **Foundations**

1 Introduction
Why the neglected adult clubfoot remains a global problem

2 Applied Anatomy
Pathoanatomy and the contracted structures

3 Basic Principles
The Ponseti sequence and Ilizarov biology

4 Etiological Classification
An age-stratified treatment algorithm

PART II **Evaluation & Planning**

5 Clinical Evaluation
History, examination and outcome measures

6 Classification & Grading
Pirani and Diméglio in older feet

7 Imaging & Preoperative Planning
Radiographic angles, CORA and frame planning

PART III **Surgical Technique**

8 Surgical Technique, Step by Step
Tenotomy, frame construct and hindfoot fixation

9 Osteotomies & Combined Deformity
When soft-tissue distraction is not enough

10 Foot & Heel Lengthening
Restoring length and shape

11 Modern Adjuncts – The Hexapod
Hybrid frames and computer-guided correction

PART IV **After Surgery**

12 Postoperative Protocol
Correction schedule and in-frame physiotherapy

13 Frame Removal & Rehabilitation
Bracing, footwear and daily living

14 Complications
Classification and stepwise management

PART V **Evidence & Practice**

15 Published Evidence & Outcomes
What the literature tells us

16 Illustrative Case Studies
Decision-making from real cases

17 Take-Home Points & Self-Assessment
Review questions for the trainee

BACK MATTER

- Appendix – Clinical Documentation Templates (pre-operative clinical and radiological evaluation, frame design and operative planning, post-operative rehabilitation and follow-up)
- References – categorised books, monographs and journal literature
- About ASAMI India · Acknowledgements

About the Book

Clubfoot that was never treated, or treated incompletely, does not stay a childhood problem. In adolescents and adults the foot becomes rigid, the skin and soft tissues adapt, and walking on the side or top of the foot brings pain, callosities and disability. Conventional surgery often trades deformity for a short, stiff foot.

The Neglected Foot Reclaimed brings together the principles of Ilizarov gradual correction and practical experience from a busy limb-reconstruction practice in eastern India. It follows the patient from first examination to frame removal and long-term follow-up – explaining not only how, but why, each step is done.

Inside the book

- 17 chapters in five parts, from anatomy to outcomes
- Step-by-step surgical technique with original line diagrams
- Planning with radiographic angles, CORA and hexapod adjuncts
- Complications – classified, with practical management
- Ready-to-use clinical documentation templates
- Self-assessment questions for trainees

Written for

- Orthopaedic residents and fellows
- Young surgeons starting Ilizarov practice
- Foot & ankle and paediatric orthopaedic surgeons
- Limb-reconstruction teams and physiotherapists
- Teachers running Ilizarov and deformity courses

About the Author

Dr. Shamsul Hoda (MBBS, D.Ortho, MS Ortho, M.Ch. Orth, Dip. Ilizarov (Kurgan)) is an Ilizarov and limb-reconstruction surgeon at Ortho World, Patna and Hajipur, Bihar. He trained in Ilizarov applications at Kurgan, Russia, and in advanced limb deformity correction at RIAO, Baltimore, USA. He is Chairman of the Academic Committee of ASAMI India, a past National Secretary of the association, and has taught as international faculty in Russia, Egypt, Bangladesh and Malaysia.
